

DONNYBROOK DISTRICT HIGH SCHOOL

An Independent Public School

SUN PROTECTION POLICY

Rationale

Too much exposure to ultraviolet (UV) radiation from the sun causes sunburn, eye damage, skin damage and increases the risk of skin cancer. Sun exposure in the first 15 years of life contributes significantly to the lifetime risk of developing skin cancer. Australia has the highest rate of skin cancer in the world.

Skin cancers account for 80% of all new cancers diagnosed in Australia each year.

Melanoma is the most diagnosed cancer for 15 – 44 year olds.

Staff will act as role models in line with the SunSmart program role modelling requirements and OHS standards. Staff are required to adopt all protective measures put in place by their employer as part of employee OHS responsibilities.

Objectives

The goals of the SunSmart Policy are to;

- Increase student and community awareness about skin cancer and sun protection
- Encourage the entire school community to use a combination of sun protection measures all year round
- Work towards a safe school environment that provides shade for students, staff and the school community
- Assist students to be responsible for their own sun protection
- Ensure that families and new staff are informed of the school's SunSmart policy

Sun Protection strategies:

- All students and staff use a combination of sun protection measures throughout the day to ensure they are well protected. Particular care is taken between 10 am and 3 pm when UV levels reach their peak.
- The SunSmart policy is considered when planning all outdoor events e.g. assemblies, camps, excursions and sporting events. Where possible, we aim to have outdoor activities or events earlier in the morning or later in the afternoon, and use indoor venues.

1. Shade

- The school makes sure there is a sufficient number of shelters and trees providing shade in the school grounds particularly in areas where students congregate eg. Lunch area, canteen, outdoor lesson areas and popular play areas.
- In consultation with the school council, shade provision is considered in plans for future buildings and grounds.
- The availability of shade is considered when planning excursions and outdoor activities.
- Students are actively encouraged to use available areas of shade when outside.
- Students who do not have appropriate hats or outdoor clothing are actively encouraged to wear hats available from the PE Office and select classrooms.

2. Clothing

- All styles of school uniform will include collars that protect the neck, and sleeves. Shorts, dresses and skirt lengths will extend as close to the knee as possible. School clothing is made of close weave fabric. Rash vests or t-shirts encouraged to be worn when swimming outdoors.

3. Hats

- Students are encouraged to wear hats that protect their face, neck and ears, i.e. bucket or broad-brimmed whenever they are outside. (Baseball caps are not considered sun protective)
- Students who do not have an appropriate sun protection hat are encouraged to wear a hat provided from the school.

4. Sunglasses

- Students and staff are encouraged to wear close fitting, wrap around sunglasses that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4) and cover as much of the eye area as possible.

5. Sunscreen

- SPF 30+ (or higher) broad spectrum, water resistant sunscreen is available for staff and student's use.
- Students and staff are actively encouraged to apply SPF 30+ (or higher) broad spectrum, water-resistant sunscreen regularly eg. prior to school, before lunch, PE lessons, Physical Recreation lessons, sporting events, excursions etc.
- Staff act as role models by:
 - wearing sun protective hats (broad brimmed, bucket or legionnaire hats), clothing and sunglasses outside.
 - applying SPF 30+ broad spectrum, water resistant sunscreen
 - seeking shade whenever possible
- Families and visitors are encouraged to use a combination of sun protection measures (sun protective clothing and hats, sunglasses and sunscreen) when participating in and attending outdoor school activities.

Curriculum

- Sun protection, skin cancer awareness programs and healthy UV exposure for Vitamin D are incorporated into appropriate areas of the school curriculum in all year levels.
- Students are encouraged to be involved in initiatives to promote and model sun protection measures to the whole school community.
- SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school homepage, parent meetings, staff meetings, school assemblies, student and teacher activities and on student enrolment.

Recess and Lunch Break

- Consideration is given to time allocation for recess and lunchtime to reduce the direct UV exposure to students during the middle of the day when UV levels peak.

Review

- The school council and staff monitor and review the effectiveness of the sun protection policy every two years and revise the policy when required. Next policy review:
